CDOTs BRONCO BRIDGE REPLACEMENT ABC-UTC November 2019 Webinar

Current Implementation

CDOT and ABC

- ABC is fully supported by Staff Bridge.
- The design process is required to investigate use in the Structure Selection Report
- Implementation includes
 - Slide in (whole or partial)
 - UHPC
 - Decked girders
 - A-typical precast elements such as pier caps and abutments
 - Coordination of resources (CDOT's and the Contractor's)

Many reasons to utilize ABC on projects. One that stands out:

Minimize impact to the traveling public
